#### HEAVEN:

Paradise is a religious or metaphysical term for a place in which existence is positive, harmonious and eternal. It is conceptually a counter-image of the supposed misery of human civilization, and in paradise there is only peace, prosperity and happiness. Paradise is a place of satisfaction but it is not necessarily a land of luxury and idleness. Paradise is often called a “higher place”, the holiest place in contrast to the world and universally accessible or due to earthly beings according to various standards of divinity, goodness, godliness, faith or other virtues or right belief or simply the will of God.
